Who is GLOBALTRANS? ←

GLOBALTRANS is a mid-sized logistics company. It has sites at 5 locations across Germany. A comprehensive network of logistics partners enables it to provide global logistics services.

GLOBALTRANS

What is special about GLOBALTRANS?

Communication, cohesion and short non-bureaucratic pathways accurately describe the working environment within the company. These characteristics are evident within and across all departments. The team at GLOBALTRANS work hand in hand throughout Germany and exchange ideas with each other.

The staff are supported by state-of-the-art technology. They also know that often it is more important simply to pick up the phone and talk to people.

Many things can be clarified more effectively with customers and colleagues through personal communication than by e-mail.

This often leads to **new ideas** and combinations that result in your freight reaching its destination more quickly or more cheaply.

What does GLOBALTRANS do?

The core business of the company covers the complete spectrum of air and sea freight. From standard shipments to special consignments, **GLOBALTRANS** offers the ideal route to your destination.

You won't find compartmentalised thinking or one-size-fits-all services at GLOBALTRANS. Even though our **core competences** are clearly defined, you – our customers – have your individual requirements.

An express consignment may require a courier service. Alternatively, shipment by truck may be the most suitable option for your freight. All this is organised for you by your **contact person at GLOBALTRANS**.

Value Added Service is certainly a fine-sounding phrase. But which services actually represent added value for you? Is it the quality and quantity control of your shipment? The regularly updated flight schedule? Or drawing up documents in accordance with the letter of credit?

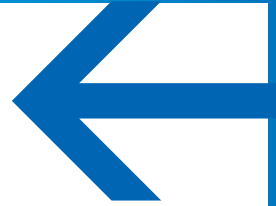

Discuss your requirements with your **contact person at GLOBALTRANS**.

GLOBALTRANS

Air freight - imports

- ➔ Pre-carriage in the country of dispatch
- ➔ Export customs clearance
- ➔ Air freight in direct or groupage transport
- ➔ Harmless goods, hazardous goods, temperature-sensitive goods, live animals, highly sensitive goods and valuable cargo

- ➔ Sea freight in FCL, LCL and break bulk shipments
- ➔ Harmless goods, hazardous goods, temperature-sensitive goods, etc.
- ➔ Import customs clearance in the country of receipt
- ➔ Delivery to recipient
- ➔ Standard services
 - ➔ written confirmation of booking
 - ➔ shipping data by e-mail
 - ➔ active tracking of shipment and provision of status information to you

Rail transport from China to Germany

Simply get on the train!

China is one of the core markets of GLOBALTRANS. Many tonnes of goods are imported each year from there to Germany. A large proportion of the shipments are transported by sea freight with a transit time of around 30 days. Up to now the only quicker alternative was the far more expensive option of air freight.

It is particularly annoying when a production delay means you miss a departure date by just a few days and you have to resort to shipment by air.

With a transit time of 16-18 days, rail fills this gap, and is significantly cheaper than air freight. You decide whether you need an FCL or LCL shipment.

Reserved weekly allotments give you the security of being able to reserve space at short notice.

Truck transportation

- national and international road transport
- Collective shipments
- Complete and part shipments
- System logistics
- Heavy goods shipments
- Special shipments

GLOBALTRANS

Product-specific logistics

The required standards for e.g. textiles differ hugely from those for highly sensitive ultrasound equipment. For example, in medical technology it is extremely important that the trucks have air suspension systems in the leading and trailing axles. In the fashion industry it is often necessary to perform quality inspections and order picking to customer requirements and to relabel the textiles.

GLOBALTRANS has defined **its own standards** for the following industrial sectors.

- ➔ Medical technology
- ➔ Pharmaceuticals
- ➔ Fashion
- ➔ Ship and aircraft components

To be honest, standards are all well and good, but **product requirements** are as diverse as the requirements of each individual customer. Here it is important to define and implement the **individual standard**. How is this performed? Quite simply, in collaboration with your **own contact person**.

International

GLOBALTRANS operates worldwide together with carefully selected accredited partners.

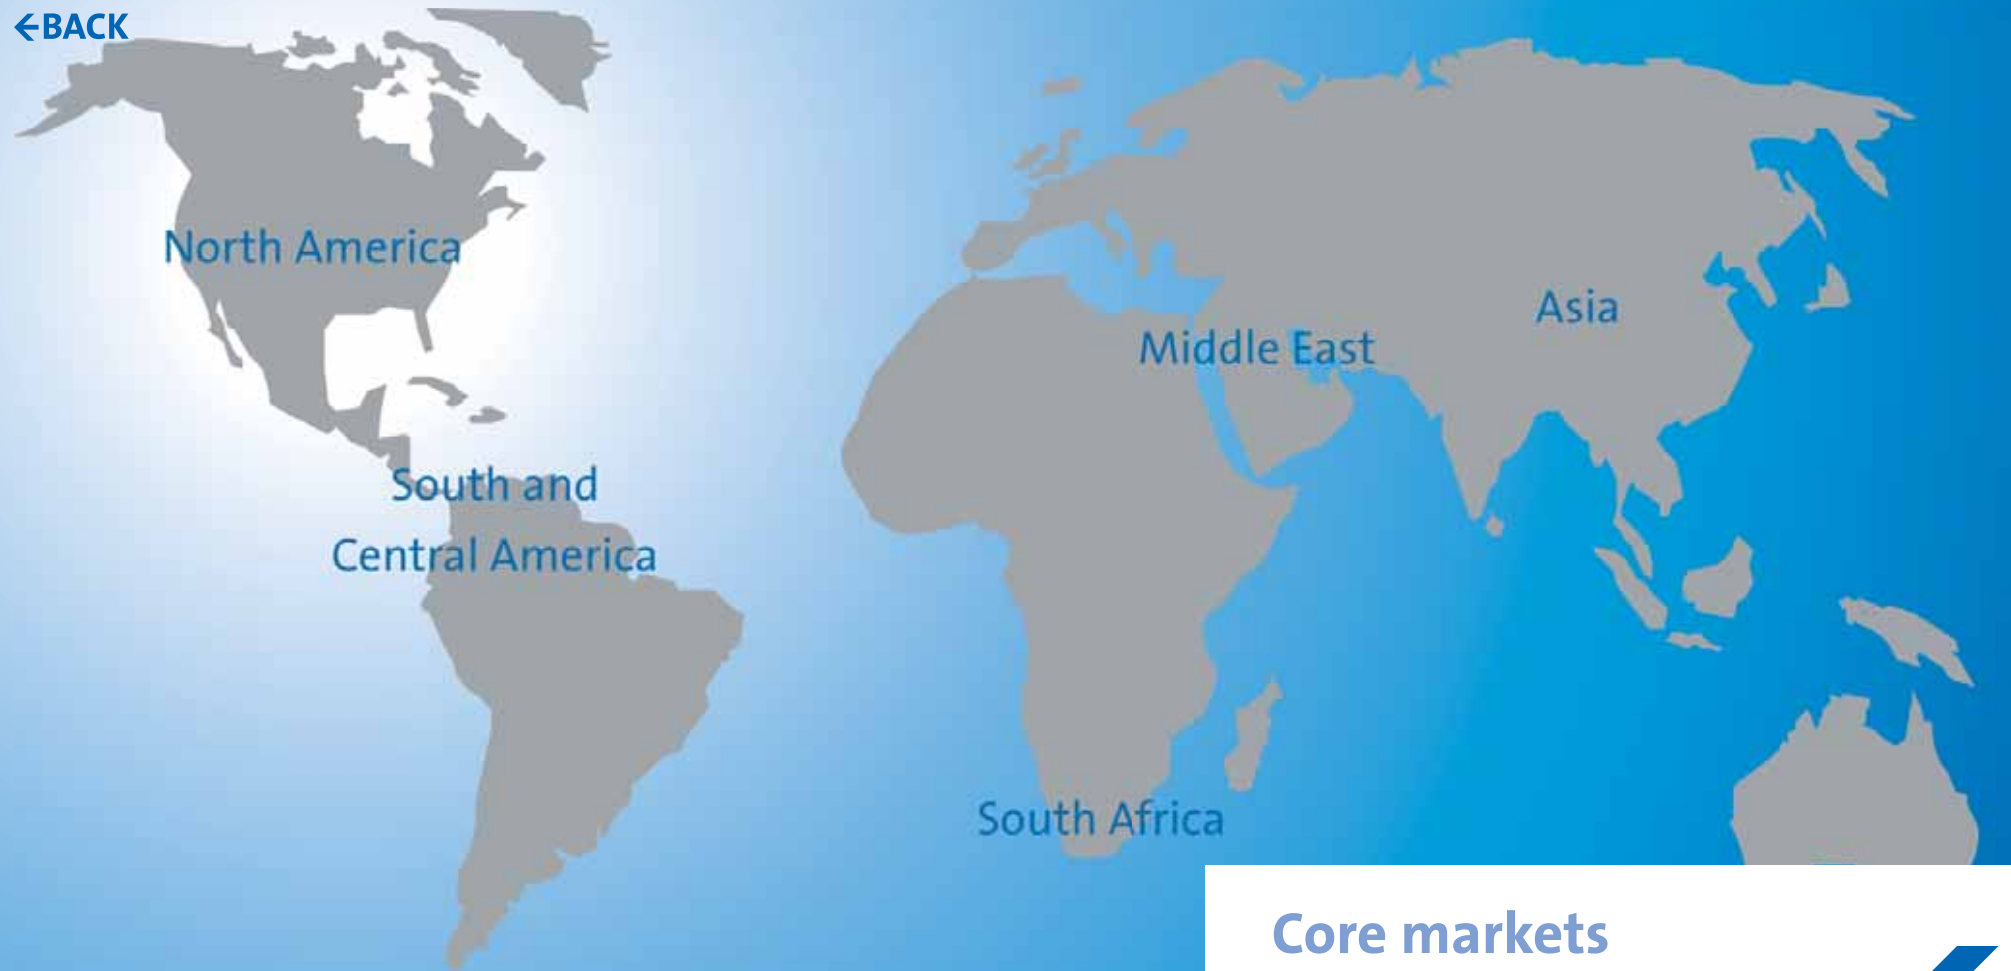

The **quality** of services, the local **networks** and the **working conditions** are all important criteria in the selection process. This ensures that your freight is in good hands with all our partners.

Well-trained staff and close contact with major freight carriers are also key factors when considering a company as a possible partner for **GLOBALTRANS**.
